Summary

Passionate software developer with a strong aptitude for problem-solving and building efficient, scalable solutions. Skilled in translating complex challenges into practical applications, with a keen interest in continuous learning and development in modern technologies.

Skills

Programming Querying: C, C++, Java, C#, SQL, HTML, CSS, JavaScript, PHP

Frameworks Libraries: React, TypeScript, Next.js, Node.js, Nest.js

Data Visualization: MS Word, MS Excel, MS PowerPoint

Productivity Tools: Adobe Photoshop, Adobe Lightroom

Experience

Researcher

July 2025 – Present

Artificial Intelligence & Web Technologies (AIUB)

Dhaka, Bangladesh

- Applied advanced AI frameworks and modern web technologies to deliver high-impact, scalable research results.
- Conducted research on modern web development technologies, exploring front-end and back-end frameworks such as React, Next.js, and Node.js to build performant, scalable, and maintainable web applications.

Projects

Reinoir Perfume Brand | *ReactJS, TypeScript, Next.js* | [Demo](#)

Jan. 2026 – March 2026

- * Fully Responsive: Optimized for Mobile, Tablet, and Desktop with custom navigation and interactive elements.
- * Dynamic Product Showcase: Interactive product modals with image galleries for an immersive shopping experience.
- * Optimized Performance: Built with **Next.js** for lightning-fast loading speeds and SEO optimization.
- * Automated Order System: Custom order form integrated with **Google Sheets API** for real-time order tracking.

CoreEdge – Software Agency Portfolio Website | *JavaScript, HTML, CSS* | [Demo](#)

Feb. 2026 - Feb 2026

- * Responsive Web Design Fully responsive layout ensuring seamless performance across desktops, tablets, and smartphones.
- * Dynamic and Modern UI, Glassomorphic effects.
- * Functional Contact System JavaScript-validated contact form for reliable and professional client communication.

Restuarant Management System | *PHP, MySQL, JavaScript, HTML, CSS, Bootstrap* | [Demo](#) Oct. 2025 - Dec. 2025

- * Developed a full-stack Restaurant Management System to automate menu handling, order processing, and customer feedback.
- * Implemented role-based authentication and dashboards for **Admin, Employee, and Customer** ensuring secure access control.
- * Designed a dynamic navigation system that updates based on user login status to enhance user experience.
- * Developed an order tracking workflow allowing admins to manage order status (*Pending* → *Cooking* → *Served*).
- * Created a responsive heritage-themed UI using Bootstrap, ensuring compatibility across mobile, tablet, and desktop devices.

Awards & Certifications

- **Winner - National Photography Contest:** Get a huge experience by winning the photo contest.
- **Dean's List Award – 2024 Fall Semester:** Recognized for outstanding academic performance and achieving top grades in the semester.

Education

B.Sc. in Computer Science and Technology

American International University-Bangladesh (AIUB)

CGPA: 3.51/4.00 (up to 10th Semester)
